Office Action Summary	Application No. 10/519,226	Applicant(s) CHIKARAISHI, KAZUO	
	Examiner Anne Marie M. Boehler	Art Unit 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3611

1. Claims 5, 6, and 8 are objected to because of the following informalities:

In claim 5, line 3, before "heat radiation fins" "the" should be deleted.

In claims 6, line 2, "a" should be inserted before "housing".

In claim 8, before "heat radiation fins" "the" should be deleted. Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Endo (USPN 5,732,790).

Endo shows a power steering system with a worm speed reducer 152, 117b mounted in gear housing 150. The gear housing includes cooling fins 150a (Figure 7) on its exterior that form a cooling means to dissipate heat during operation of the gearing.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Endo in view of Behnke (USPN 5,056,213).

Endo lacks a fan attached to the worm of the worm gear speed reduction.

Behnke shows a motor 15 speed reduction gearing arrangement with a worm 22 and worm wheel 24 mounted in a gear housing 10. At least one cooling fan 46, 48 is attached to the worm 22 to help cool the gearing.

It would have been obvious to one of ordinary skill in the art to provide a cooling fan attached to the worm gear, as taught by Behnke, in order to enhance cooling of the gearing.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Achenbach show a power steering system with cooling means.

Acker and Sharp each show a cooling fan mounted to a worm shaft.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne Marie M. Boehler whose telephone number is 571-272-6641. The examiner can normally be reached on 7:30-5:00, Monday-Thursday, and alternate Fridays.
